

Industrial

We have been supplying staff to the industrial sector for over 20 years. The reason for our success? Many of our clients consider our temporary placements service to be an integral part of their recruitment process.

- We build lasting partnerships with our clients, so we understand what they need
- We are extremely efficient, responding within **15 minutes** with details of who we will supply; staff arrive within **1 hour**
- We ensure our candidates are personally interviewed, screened to industry leading standards, and fully briefed about their role. Read about our approach to Health and Safety below.

Roles we provide:

Warehouse Workers
Porters
Packers
Assembly Line Workers
Apprentices

Health and Safety

We always check our candidates' understanding of key Health and Safety principles – because we understand it's critical in your industry.

So you have peace of mind that the member of staff you receive from us will be ready to hit the ground running.

Medical questionnaire

Temps working in factory or workshop environments, where any kind of machinery is operated, are required to complete a medical questionnaire by ourselves. Safety is highly important in the industrial sector and we know that it is our responsibility to be aware of all dangers.
